Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 31 January 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 38-57 is/are pending in the application.
- 4a) Of the above claim(s) 52-57 is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on January 31, 2006 has been entered.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
- I. Claims 38-51, drawn to a supply chain management system, classified in class 705, subclass 8.
 - II. Claims 52-57, drawn to a method of supply chain management system, classified in class 705, subclass 28.
3. Inventions Group II and Group I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus can be used to practice a materially different process that can be practiced by hand.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Newly submitted claims 38-51 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: No requisition cycle in a supply chain management system was originally presented.

Since applicant has received an action on the merits for the originally presented system invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 52-57 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Mr. Mark R. Malek (Reg. No. 46,894) was spoken to on April 17, 2006 advising him of the restriction requirement and election by original presentation.

Claim Rejections - 35 USC § 112

8. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

9. Claims 38-51 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claims 38-51 do not have support from the original application regarding an off-board failure code. Also, the off-board failure code in juxtaposition with the one failure code is not clear. Further, the authorized delivery in juxtaposition with the off-board failure code is not clear. The descriptive portion of the specification in juxtaposition with the drawings do not clarify this claim language. Thus, the Examiner cannot ascertain the meets and bounds of the claims in juxtaposition to the application, as originally filed. Applicant's January 31, 2006 REMARKS have been reviewed, but are not agreed with. Applicant must clearly show and particularly point out where support for such claim language is manifested within the originally filed specification and drawings.

Claim Rejections - 35 USC § 103

10. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

11. Claims 38-51, as understood, are rejected under 35 U.S.C. 103(a) as being unpatentable over Gelvin et al., 6,826,607.

Gelvin discloses a requisition cycle in a supply chain management system for vehicle asset management, e.g. Fig. 51, cols. 72-76. Gelvin does not disclose the term off-board failure code. As understood, off-board failure codes as recited have been common knowledge in the diagnostic asset management art. To have provided such for Gelvin would have been obvious to one of ordinary skill in the art.
